Rawalpindi, Pakistan | LinkedIn-Profile | GitHub-Profile

Professional Summary

I am a Machine Learning Engineer focused on building end-to-end data-driven solutions, from raw data preparation to model training, evaluation, and deployment-ready pipelines. Backed by strong OOP, DSA, database, and networking skills, I work mainly in machine learning, with practical experience in Computer Vision and Natural Language Processing. I handle the full workflow, including data cleaning, experimentation, and performance tuning, with an emphasis on building simple, reliable, and maintainable solutions. I also worked on full-stack development covering frontend and backend technologies including React, Node.js.

Education

Bachelor of Computer Science (BCS) PIEAS University, Islamabad CGPA: 3.26/4.00	2022–2026
Relevant Coursework: OOP, Data Structures & Algorithms, Operating Systems, Computer Networks, Database Systems, Software Engineering	
Higher Secondary School Certificate (HSSC/F.Sc.) 998/1100	2020–2022
Secondary School Certificate (SSC/Matric) 1008/1100	2018–2020

Experience

Machine Learning Intern — Neurog.ai Islamabad, Pakistan | 7/2025 – 9/2025

Completed a Summer Internship Program at Neurog.ai, gained hands-on experience in machine learning, deep learning, and predictive analytics. Collaborated with the team to deliver a comprehensive, full-fledged application covering frontend, backend, database integration, and model training. Successfully developed and completed the "Trade Tactics" project under expert supervision within an AI-focused environment.

Tools: Node.js, React, Tailwind, PostgreSQL, PyTorch, NumPy, Pandas

Data Science Intern — Pattern Recognition Lab Islamabad, Pakistan 06/2024 – 08/2024

During my summer research internship at the university lab, I worked with my professor on a computer vision and deep learning project. I designed a framework to predict critical heat flux in thermal systems by implementing decision tree regression, autoencoders, and hybrid models. I also performed feature influence analysis, error quantification, and comparative visualizations to improve the system's performance.

Tools: Pandas, Numpy, matplotlib, Seaborn, Pytorch, encoder-decoder

Technical Skills

Programming & Development:

- Languages & Frameworks: React, Node.js, RESTAP
- Tools & Libraries: Docker, Git, GitHub, GitHub Action, Kubernetes, Hugging face, Scikit-Learn, Keras, PyTorch, Scikit-learn, NLTK
- Database Systems: SQL, PostgreSQL, MySQL

AI and Machine Learning Skills:

- Core Skills: Machine Learning, Deep Learning, Generative AI, LLMs, Natural Language Processing (NLP), Time Series Analysis, OOP, DSA, Networking skills, Database.

Communication & Collaboration:

- Strong in technical writing, effective communication, and team collaboration.
- Fluent in English and Urdu.

Selected projects

AI -Powered Human Surveillance application Mar 2025 – June 2026

Developed a privacy-first, light-independent computer vision system that utilizes advanced skeletal motion analysis to identify unseen threats through automated, contextual anomaly detection. By focusing on skeletal trajectories rather than pixel-based identification, the platform ensures secure, high-speed surveillance that remains effective in complex, mission-critical environments. Designed for seamless scalability, the system easily deploys across high-traffic public areas such as shopping malls, airports, and educational campuses, to automate safety protocols and crowd monitoring. Fully hosted on Hugging Face, the solution effectively replaces traditional, reactive monitoring with proactive, behavior-based security while strictly safeguarding individual privacy

Hackathon Winner

Agentic AI Competition (2nd position) 17th Feb 2026

- Developed an intelligent GitHub repository assistant powered by Mistral AI
- Features adaptive reasoning (adjusts AI depth based on network latency), voice I/O, and persistent chat sessions
- Built with Streamlit, LangChain, and custom RAG pipeline for repository analysis

Certification And Award

- | | |
|---|---|
| Supervised Machine Learning: Regression and Classification | – Stanford University, Coursera |
| Advance Learning Algorithms | – Stanford University, Coursera |
| Unsupervised Learning, Recommenders, Reinforcement Learning | – Stanford University, Coursera |
| Intermediate SQL Learning | – Code Camp |
| Microsoft Learning Student Ambassador | – Google |
| NeuroG Company Certificate | – Neurog Company Appreciation Certificate |
| Microsoft Learning Student Ambassador | – Google (Awarded for attending meetings) |
